

IN THE SPECIFICATION

Please amend the paragraph on page 1, line 6, through page 2, line 2, as follows:

The present invention relates to a data transmission apparatus, a data receiving apparatus, and a data transmitting-receiving method. More particularly, the invention relates to a data transmission apparatus used for a server for data communication which is independently connected to a packet transmission channel, a server for data communication which is installed in a switching station apparatus, a ~~sever~~ server which is installed in a base station apparatus of a mobile communication system, and so on; a data receiving apparatus used for an information communication terminal apparatus, such as a personal computer, for data transmitting-receiving through a wire channel, or for a mobile station apparatus in a mobile communication system such as a cellular telephone, and an information communication terminal apparatus provided with a cellular telephone function and a computer function; a data transmitting-receiving method between the data transmission apparatus, and the data receiving apparatus; and, a data transmission apparatus, a data receiving apparatus, and a data transmitting-receiving method, which efficiently perform playback

and preservation of moving images and voice data in a communication environment in which code errors and congestion are easily occurred.
